

67% AGREE

Ease the Squeeze Now.

High oil prices squeeze everyone.

On July 13, 2008 a bi-partisan survey, conducted by Public Opinion Strategies and The Mellman Group, found:

- 80% believe oil speculation is manipulating oil markets.
- 70% believe oil speculation is driving up the cost of oil.
- **67% of Americans want Congress to pass new rules on oil speculation.**

From the price of gas and home heating oil, to the rising cost of food, we are all in this together.

We can't wait. Before the August recess, Congress must come together to pass bi-partisan legislation that curbs excessive speculation *and* increases production.

And that's something we can all agree on.

**Ease the Squeeze
Before the August Recess.**
